Talent is power, tact is skill, talent is weght, tact is momentum, talent knows what to do, tact knows how to do, it. When you find a combination of both tact and talent in the same individual, you may set it down that he is equal to any emergency; and that is why J. M. He knows what to buy, and when to buy it; he knows how to combine the useful with the or-mamental; he displays his clothing and furnishing goods so that ther merits are easily distinguished, and his tact tells him that more money is made by selling two dolars' worth of
